Donald J. Trump

@realDonaldTrump

As the President of the United States, I will stand up to Countries that attack our incredible American Tech Companies. Digital Taxes, Digital Services Legislation, and Digital Markets Regulations are all designed to harm, or discriminate against, American Technology. They also, outrageously, give a complete pass to China's largest Tech Companies. This must end, and end NOW! With this TRUTH, I put all Countries with Digital Taxes, Legislation, Rules, or Regulations, on notice that unless these discriminatory actions are removed, I, as President of the United States, will impose substantial additional Tariffs on that Country's Exports to the U.S.A., and institute Export restrictions on our Highly Protected Technology and Chips. America, and American Technology Companies, are neither the "piggy bank" nor the "doormat" of the World any longer. Show respect to America and our amazing Tech Companies or, consider the consequences! Thank you for your attention to this matter.

DONALD J. TRUMP, PRESIDENT OF THE UNITED STATES OF AMERICA

Europe's Digital Leaders Call for "Tech Sovereignty"

The anti-protectionist, pro-tech D9+ alliance switches sides as Europe debates targeting US digital services with tariffs and other measures.

Dutch parliament calls for end to dependence on US software companies

By Tol
March

- 80% total spending on cloud software and services for professional use in Europe went to' American companies, representing a volume of 265 billion'euros.

Big win: Germany, sovereign EU-

ARGUMENT

An expert's point of view on a current event.

Europe Must Avoid Digital Colony

The EuroStack is the continent's last chance for tech

Digital sovereignty: less dependency, more European integration

The coalition partners are focusing strongly on digital sovereignty – an approach that could have far-reaching consequences for companies.

- Building European integrated and resilient value chains:** "We are creating European integrated and resilient value chains for key industries, from raw materials and chips to hardware and software." This is intended to reduce dependence on non-European manufacturers – both from China and the USA.
- Strengthening open interfaces and standards:** "We ensure our digital sovereignty: we define open interfaces and open standards across all levels and systematically promote open source [...]." This is a reaction to the increasing dependence on proprietary systems, which are causing huge difficulties in the context of digital transformation and have had an enormous braking effect. With regard to open source, two options are discussed in the document – either "define ambitious targets" or specifically "achieve an open source share of 50% by 2029" for the IT budget.
- Exclusion of untrustworthy providers:** "We will exclude untrustworthy providers with legal certainty in future." This refers primarily to critical infrastructures and is likely a reference to the debate surrounding providers in the 5G network.
